

Voyix KT2200 Kitchen Touch Display

High visibility, durability and ease of use
for demanding kitchen environments

The KT2200 Kitchen Touch Display helps restaurants run a faster, more accurate kitchen by replacing paper tickets with a rugged, purpose-built touch screen. Designed for the heat, humidity and constant use of back-of-house environments, it integrates seamlessly with Voyix Kitchen and the KC4 and KC5 Kitchen Controllers, giving teams clear, real-time visibility of every order. The result is a calmer line, more consistent execution and a better experience for guests and staff.

Highly visible, easy to use

The 21.5 inch full HD display delivers crisp, easy-to-read order information across the line. Projected Capacitive (PCAP) touch technology supports 10-point multi-touch, gestures and single touch, so anyone familiar with a smartphone will be comfortable using the KT2200.

Purpose built for the kitchen

The KT2200 is fully enclosed in stainless steel that cleans easily and helps prevent typical kitchen contaminants from entering the housing. Flexible VESA 100 mm mounting supports wall, pole, ceiling and radial arm installations, so the display can be positioned for staff of different heights in space-starved kitchens.

Fully integrated

The KT2200 integrates seamlessly with the NCR Voyix KC4 and KC5 Kitchen Controllers and can also be used with select third-party kitchen systems. An integrated speaker, simplified I/O panel, and locking power connection help keep installation clean and operation reliable shift after shift.

Key benefits

- Keeps orders moving during every rush with clear, real-time visibility on the line.
- Helps reduce remakes and waste by giving staff a single, accurate view of every order.
- Supports consistent execution across dine-in, takeout, drive-thru and off-premise orders.
- Built to withstand heat, humidity and grease in busy back-of-house environments.
- Flexible mounting that fits space-starved kitchens and accommodates staff of different heights.

Hardware model technical specifications

Product dimensions

- Width: 1.8" (4.7cm)
- Length: 21.5" (54.6cm)
- Height: 12.5" (31.7cm)
- Weight: 6.6lb (3.0kg)

LCD technology

- Active Matrix TFT LCD

Aspect ratio

- 16:9

Resolution

- Full HD 1920 x 1080

Pixel pitch

- 0.24795 x 0.24795 mm

Horizontal scanning

- 31.47 to 82.3 kHz

Refresh rate

- 56 to 75 Hz

Touch technology

- Projected Capacitive (PCAP) with 10-point multi-touch

Touch surface

- Glare treatment

Touch interface

- USB controller

Transmittance

- 90 percent plus or minus 5 percent

Enclosure

- Fully enclosed stainless steel

Integrated speaker

- Yes

I/O (DVI models)

- DVI, VGA, USB Type B, 3.5 mm line out audio

I/O (DP models)

- DisplayPort++ (locking), HDMI, VGA, USB Type B, 3.5 mm line out audio

VESA mount

- 100 mm pattern

Mounting options

- Wall mount, radial arm, pole, ceiling (VESA 100 mm)
